

## Guide: How to install Ruukki's programs

*It is possible to download and install programs before you have done the registration. Program operates in demo mode until the license has been acquired and activation code related to it has been input.*

0. Install the program.

If operating system is Windows Vista or Windows 7 start the installation with clicking installation program with mouse's right button. Choose from popup menu command "*Run as administrator*". By starting the installation using this option, you can ensure that the registry entries are saved correctly.

### 1. Register yourself as a user at site software.ruukki.com

### 2. Add to chart the programs you want to acquire the license code

**Load bearing sheet design software - Poimu**

- Software used for design of load bearing profiles produced by Ruukki
- Software that includes two interfaces: 'Full designer version' for detailed design and a simplified 'Easy and quick pre-selection version' for fast product selection and optimisation
- The software is intended to be operated by civil/structural engineers or otherwise adequately qualified persons
- Software that enables capacity verifications for the service limit state and ultimate limit state also including stressed skin design and fastener design

6. Start the program and open registration part.

or

7. Push Get code button

8. Fill (if needed) Ruukki Design Toolbox login information and give end user registration information and push Ok button.

The screenshot shows a dialog box titled "Ruukki Toolbox ...". It contains four text input fields: "USERNAME" with the value "Anyuser", "PASSWORD" with "\*\*\*\*\*", "Owner name" with "Jaska Jokunen", and "Owner Email" with "jaska.jokunen@ruukki.com". At the bottom, there are "OK" and "Cancel" buttons.

9. If free license is available activation code is returned to "Registration code" field.

The screenshot shows a dialog box titled "Registration - PROFILI v.5.00 - [1.010/10.05.2011]". It has a "User" section with a "User" field containing "Garfield" and a "Change" button. Below is a "Registration" section with "Status: Program is registered correctly.", "Registration date: 19.05.11", "Product/Machine code: 9B2145604EADF1C80395ADC3600EAEA9", and "Registration code: 110525A50688F4DF38918861906CC598D498:". There are "Get code", "Toolbox ...", and "Register" buttons. A status bar at the bottom says "Registration code is ready for registration!".

10. Push Register button to complete the registration.

This screenshot is similar to the previous one, but it shows a smaller "Registration" dialog box overlaid on top. This smaller dialog box has the title "Registration" and the message "Program registered!" with an "OK" button. The background dialog box is partially obscured.

If for some reason automatic registration does not work even free licenses exists the registration can be still done manually as before.

11. Highlight and copy (Ctrl C) the Product/machine code and switch to software.ruukki.com site.

12. Log in to software.ruukki.com-site if needed

13. Click My Licenses-button if needed

14. From opening list select the program you want to register. To activate the license, select the Activate and click it.[1]

Software name	Order date	Regist. date	Owner name	Owner email	Machine code
Light weight purlin design software - PurCalc	19.05.2014				ACTIVATE [1]
Single pile design software - RrPileCalc	07.05.2014				ACTIVATE
Light weight purlin design software - PurCalc	28.02.2013				ACTIVATE

15. After selecting "Activate", new dialogue will open. Copy the "Product/machine code" [1] (step 12) and insert it to field "Product code [1]". After this, select "Get License".

After clicking "Get License", activation code [2] will be generated.

16. Copy (Highlight + Ctrl C) just created Activation code

**Activation code:**  
1408118A288FE2138EF168D5807EC921294E33

17. Paste activation code to program and click OK

Each program has to be activated to get all (full version) features available.
